

American-Canadian Genealogical Society of N.H.

Board Meeting - September 12, 1976 - at Lucille Lagasse's home,
Goffstown, N.H.

I have no notes on the minutes of this meeting.

I did not attend this meeting because of a previous engagement at Portsmouth, N.H. An open-house at the new laboratory of the Normandeau Associates, Inc. for whom I have written a history and some genealogy of the Pickering Family, since John Pickering was the first occupant of his "Pickering's Neck" which included part of the present Strawberry Banke. The site of the laboratory was the location of an early shipyard. Old John may have looked over his future "neck of land" as early as 1633; today, Normandeau's company and boats do ecological work on "Pickering's Neck."

Jeanette Dinwoodie
